

Internship Offer Letter

Dear OSHIN VERMA

Internship Offer – Data Analytics Intern

We are pleased to offer you an internship position with **DCK Media & Business Consulting**. We believe your skills in data analysis and interest in applying coding into real projects will be a valuable contribution to our team.

1. Internship Period

Your internship will commence on **10-October-2025** and continue until **10-December-2025**, unless extended by mutual agreement.

2. Working Arrangement

This is a **full-time internship**. While our team is based at a co-working space in **Bangsar South, Kuala Lumpur**, we primarily work **remotely** and on the field with clients. You may be invited to join meetings, project discussions, or client visits when appropriate.

As a consulting firm, our work can sometimes be fast-paced with urgent tasks (e.g., completing a project within 7 days). However, **90% of our projects are planned in advance**, allowing you flexibility to manage your own time. We do, however, require you to remain **communicative during core working hours (10AM–6PM)**, providing status updates and progress reports.

3. Allowance & Incentives

- You will receive a **monthly allowance of RM1,000**.
- Should your performance exceed expectations, you will be granted an **additional incentive allowance** before the end of the month.
- In line with our company system, we conduct **pay reviews every 3 months** and consider long-term opportunities for high-performing interns.

4. Job Scope

Your main responsibilities will include:

- Building and maintaining **dashboards** for client performance tracking (Google Sheets, SQL, Python, Power BI, or Looker).
- Supporting **automation projects**, such as integrating Google Sheets, APIs, and auto-approval systems.
- Performing **data cleaning, analysis, and visualization** to extract insights from client datasets.
- Assisting in preparing **business reports, presentations, and strategy support documents**.
- Supporting the consulting team with **problem-solving and process documentation**.
- Conduct and support daily business operations to gain a comprehensive understanding of workflow, decision points, and cross-team interactions.

You will **not be working on your own** — all tasks will be carried out under the company's guidance, with full context provided before projects begin. Continuous feedback will be given to help you grow and deliver effectively.

5. Commitment & Growth

We value your commitment during this internship. Although the role is remote, it should be treated with the same dedication as an in-office role.

We also hope this internship will not just be a short-term experience for you. At DCK, we value talent very much, and with strong performance, there may be an opportunity for you to be considered for a **long-term role** with us.

6. Confidentiality

You are required to keep all company information, client details, and project materials **strictly confidential** during and after your internship.

We are excited to have you join our team and look forward to supporting your growth with **real client projects, international exposure, and practical consulting experience.**

Please confirm your acceptance of this offer by signing and replying to this letter.

Warm regards,

Sara Yeong
